Manual

Description

The BP-10-SUPER is designed for medium to large jobs including industrial plant and warehouse floors, parking garages, bridge decks, ship decks, and other

horizontal applications. The BP-10-SUPER is an electric, self-propelled, walk behind machine with a 10 inch blast pattern. It features high quality electrical components, an advanced air wash separation system, and operates on 208V, 230V, or 460V, 3 phase power. The BP-10-SUPER travels up to 100 ft. per minute and has a production capacity from 300 ft²/hr to 1,550 ft²/hr*. When coupled with the BP-9-54 dust collector, the BP-10 Super-2 is a powerful option for your surface preparation needs.

Advantages

- constant speed on inclines and declines
providing better control of the blasting process
- Integrated brake holds the BP-10-SUPER in place when idle
 - Blast motor soft start device dramatically reduces mechanical start-up vibration and required start-up current draw
 - Easily accessible panel controls
 - High Speed, Heavy Duty Bearing Unit
 - Precision Manufactured Liner Package
 - High speed bearing unit contains replaceable bearings which reduces operating costs and down time
 - All components are domestically manufactured
 - Same-day shipping on replacement components
 - UL508A manufactured control panel
 - 55 ft. tough, wear resistant type W 6/4 electrical cord
 - Operates virtually dust-free when connected to dust collector
 - Time-saving shot blasting process that strips, profiles & cleans in one step
 - Cost effective and friendly to the environment
